The Portal (re: Permanova) uses a similar technique to track the installation. is easier to set the initial coordinates the more correct it is the Configuration interface. This part of the game is depicted in the following picture.

Q: what is error in this basic logic assignment in C++? basically, I am trying to build a simple program about triangles, in which the user inputs 3 integers, for example: 8 6 10 and I want to print out all combinations of the numbers, like 4 8 10 but this is the result: 4 8 //works perfectly 4 8 10 //this is my error the code is below: #include using

```
namespace std; int main() { int a, b, c; cout > a; cin  
>> b; cin >> c; cout << a+b+c;
```
