## DVD-Audio Decoder And Watermark Detector Free License Key

===== DVD-Audio Decoder and Watermark is a foobar2000 plugin that can decode protected DVD-Audio content and detect DVD-Audio watermarks. The plugin can play back DVD-Audio discs, ISO images, AOB, MLP and Dolby TrueHD files in full resolution. The decoder is capable of playing back decoded DVD-Audio discs from the menu and file system in foobar2000. It can mark the DVD-Audio content as "Original" "Protected" or "Warning", so you can know right away which DVD-Audio discs are protected and which are not. The decoder can add a watermark as an overlay or a watermark along side of the decoded DVD-Audio content. Supported formats: ===== Plugins that can decode protected DVD-Audio content can use this plugin as a base and extend the decoder with additional features. This plugin contains all the information that the decoder needs in order to function. This plugin can decode the following formats: - DVD-Audio (9.8/9.5/9.4) - Dolby TrueHD (SP/CP) - ISO files (up to 2048x1280 resolution) - MLP - MLP files \* DVD-Audio Decoder is not a full-featured DVD decoder plugin. It doesn't decode every DVD-Audio disc in full resolution but only selected protected and not-protected DVDs. \* Although the decoder supports audio and video tracks in DVD-Audio discs, it cannot play back DVD-Audio discs with subtitles. Features: ===== - Encode and decode protected DVD-Audio discs in full resolution - Decode audio and video tracks in the main movie - Decode audio tracks in chapters, audio menus - Decode audio tracks in audio menus - Decode audio tracks in chapters (extended decoder), audio menus (extended decoder) - Mark DVD-Audio discs as "Original", "Protected" or "Warning" - Decode DVD-Audio discs with, or without watermarks - Detects video and audio tracks, watermarks and content protection - A lot of other features Usage: ===== 1. Select the DVD-Audio decoder as plugin to start foobar2000 in DVD-Audio playback mode. 2. Click "Replay" to play back DVD-Audio discs in

### What's New In?

DVD-Audio Decoder and Watermark works in foobar2000 5.11 with the help of DVD-Audio Codecs and DVD-A decoder, it's a foobar2000 plug-in and capable of decoding and detecting watermarks in DVD-Audio discs, ISO images, AOB, MLP and Dolby TrueHD files. The main feature of this plugin is that it decodes and detects DVD-Audio watermarks in a protected disc. The decoded information of the DVD-Audio discs can be viewed in the foobar2000 player window. The plugin is a very effective tool for DVD-Audio plays, music indexing and search engine in foobar2000. This plug-in is an add-on for foobar2000, it requires foobar2000 5.11 or above to run. FEATURES: \* Full resolution DVD-Audio playback \* Full resolution DVD-Audio ISO playback \* Full resolution DVD-Audio AOB playback \* Full resolution DVD-Audio ISO decoder \* Full resolution DVD-Audio MLP decoder \* Full resolution DVD-Audio Dolby TrueHD decoder \* DVD-Audio Codec detection \* DVD-Audio Content detection \* DVD-Audio watermark detection \* Supports maximum resolution of DVD-Audio up to 7.1 channel \* Supports OGG-FLAC, OGG-VORBIS, WMA and MP3, as well as 3GPP/ITU standards \* Full compatibility with all other foobar2000 plugins and add-ons. \* Incorporates foobar2000 5.11 or above to run. \* Fully integrated into foobar2000 5.11 \* You can change the color of the DVD-Audio logo and watermark SPECIFICATIONS: The DVD-Audio Codec Detection and DVD-Audio Watermark Detection are more accurate than other DVD-Audio detector plug-ins. They can detect most codecs and most DVD-Audio content, such as DVD-Audio discs, ISO images, AOB, MLP, Dolby TrueHD and 3GPP/ITU standards. The DVD-Audio decoder and DVD-Audio watermark detector works in full resolution as well as original DVD-Audio disc. It also has a great compatibility with other foobar2000 plugins and add-ons. Just use the COMPLIANCE list in the plugins options, you will find the plugin can automatically run in compatibility mode. You can easily change the plugin logo and watermark. Just add watermark and logo colors to the option section of foobar2000 and switch the Logo and Watermark colors in the plugin options. You can also change the logo and watermark font. The colors and font in the plugin options are fully customizable. Note that the DVD-Audio decoder plugin is designed for DVD-Audio discs, ISO images, AOB, MLP
