Motivated partly by AI and partly by User Research, Adobe says the addition of the Lens-Correction tool is an acknowledgment of the fact that the visual world we see through cameras is imperfect, as are lens designs. A single, common camera lens can't capture physically all of the light that is emitted from the world. The same goes for mobile devices, and it's one reason why the distortion and flare you may see occur as you take pictures. Meld, a new app from the excellent group of folks over at the Netherlands-based company Toluna, has been designed to be highly powerful, and you can see that in action in our review. You can use it to get your images ready for meetings, or create some web graphics, while it's learning your creative style, matching it to a simple or complex tone, and applying different effects. There are plenty of options for making things more stylish, and a Morphing Image feature is a good way to try out different looks and see exactly what it's doing to your image. While just a few of these features are in the Mac version of Photoshop Elements, one is missing: Content Aware Fill. Instead of letting you fill gaps and erase objects, as in Photoshop, this feature will fill in the best match. It's a clever tool, but it does have a learning curve. In Photoshop, for example, you can select an object and a 'fill' the object with a background. As you repeat the process, you get closer and closer to the original image. In the latest **May 2018 update**, Apple has dropped the version number for the Photoshop iPad app, now calling it simply *Photoshop*. The app remains otherwise unchanged. **In addition**, there have been some significant changes to the new update, and a release notes document lists them specifically.

What It Does: The Duplicate Menu organizes the various layers of your image. You can use this feature to isolate different areas that you want to create a new object from. You can change the appearance of your object in the layers panel. **What It Does:** The Paths selection estranges the areas of your image that you want to use, such as Curves, or Color

Balance. You can manipulate the paths to create interesting compositions. **What It Does:** The Scale tool lets you fit your image into a desired size. This removes unnecessary pixels and gives you greater control when exporting an image for use in another program. **What It Does:** The Straighten tool makes it easier to create straight vertical or horizontal lines in your images. You can also use the tool to manipulate the perspective of the image to fit a particular subject or subject area. Professional coloring artists use Photoshop to colorize old black-and-white photographs by placing color swatches over specific areas of the photo and then merging them together horizontally or vertically in the photograph. They can achieve a strikingly realistic and attractive glow on parts of the image. Crazy, right? And think of the ways you can use this technique with your own photographs. with the new tool set, feedback is provided to the product team via their Adobe community forums to help build out the product in the following areas-: While the desktop is getting a lot of attention, Photoshop is also available on a wide range of collaborative platforms, including, of course, Lightroom (iOS, Android, desktop, browser) and a range of on-device applications. For example, Photoshop and Lightroom apps are available on the Apple Watch, and you can use iPad Pro to edit photos directly on the desktop. The other exciting feature available on Photoshop is new Artboards support. Artboards are designed to help organize workflow and are available in the new Muse workspace. Additionally, Artboards now include the new Magnify Tool and Stylize Tool to help you work more efficiently with your images. Connected Content When it comes to **online video**, media networks, like **CBS, Lifetime, LifetimeGO and Ovation**, are in for a big bad time of it. Cues as social distancing, spread of COVID-19 and more Americans are reserving time online instead of working, many are welcoming the opportunity to catch up on streaming content and binge-watch favorite shows.
